PROFILE

Aspiring Mobile & Web Developer with hands-on experience building Android applications (Java) and Python-based AI tools, backed by a Communication Engineering foundation in networking and problem-solving. Shipped projects include a native Android app and a Python/Llama-powered document analysis tool. Seeking to apply practical development skills — Java, Python, Git — in a mobile/web development role.

PROJECTS

Self Defense Mobile App — *DOT NGO Mobile App Development Training*

- Built a native Android application in Java, version-controlled with Git, delivered as part of the DOT NGO mobile application development training program.

AI Assistant Application — *Personal Project*

- Developed a Python application integrating an embedded Llama AI model to analyze PDF documents, generate descriptions, and answer user questions with cited references from the source content.

TX RX App — *LIU University Analog Lab*

- Customizable FM radio signal transceiver application capable of receiving and transmitting FM radio signals.

SKILLS

Mobile & Web Development: Android (Java), HTML, CSS, JavaScript, PHP

Programming Languages: Java, Python, C, C++

Tools: Git

Networking & Protocols: TCP/IP, UDP, HTTP

Core: Problem-solving, cross-functional teamwork, technical documentation

EDUCATION

Bachelor of Communication Engineering

Lebanese International University (LIU), Beirut | 2019 – Expected 2027

EXPERIENCE

Ogero Telecom — *Bir Hassan, Lebanon | Field Technician Intern | Apr 2021 – Jul 2021*

- Supported installation, configuration, and maintenance of fiber optic and copper networks.
- Assisted engineers with network troubleshooting and service restoration using TCP/IP-based diagnostics.
- Configured modems, routers, and DSL services to carrier specifications for customer installations.
- Documented technical procedures and service reports to standardize team handoffs.

- Collaborated with technical teams to maintain voice and data transmission quality.

CERTIFICATES

- DOT. NGO (20/11/2022): Mobile Application Development Certificate
- DOT. NGO (10/02/2023): Robotics Certificate (Arduino)
